DETAILED ACTION

Election/Restrictions

Claims 5-9 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected fluorine-containing polymer, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 11/24/2009.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-4 rejected under 35 U.S.C. 103(a) as being unpatentable over Gilbert.

Gilbert teaches the following1-(2-hydroxyhexafluoro-2-propyl)-3,4diaminobenzene (see column 1, line 50):

Gilbert teaches the following diamine (see column 1, line 50):

Art Unit: 1796

However, Gilbert does not teach the diamines, where amines locate in para- and meta positions to each other.

The position is taken that the above diamines (ortho, meta and para) are isomers.

In accordance to MPEP 2144.09 the structural analogs are *prima facie* obvious in the absence of showing unexpected results.

Therefore, it would have been obvious to a person of ordinary skills in the art to interchangeably use ortho-, meta- and para- diamines in Gilbert's applications, since they are structural isomers.

Response to Arguments

Applicant's arguments filed 11/24/2009 have been fully considered but they are not persuasive.

Applicant submits that polymers, based on para-oriented diamines shows unexpectedly high transparency, toughness, homogeneity, heat resistance and low dielectric constants.

Art Unit: 1796

However, Applicant fails to present any physical data, supporting the statement above.

Any differences between the claimed invention and the prior art may be expected to result in some differences in properties. The issue is whether the properties differ to such an extent that the difference is really unexpected. *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

An applicant does not have to test all the compounds taught by each reference, "[h]owever, where an applicant tests less than all cited compounds, the test must be sufficient to permit a conclusion respecting the relative effectiveness of applicant's claimed compounds and the compounds of the closest prior art." Id. (quoting In re Payne, 606 F.2d 303, 316, 203 USPQ 245, 256 (CCPA 1979)) (emphasis in original).).

Since Applicant does not present data comparing a polymer, based on paraoriented diamine with the one, which build with ortho-oriented one (i.e. closest prior art), the data presented are insufficient.

The same argument relates to meta-oriented diamine.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1796

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GREGORY LISTVOYB whose telephone number is (571)272-6105. The examiner can normally be reached on 10am-7pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on (571) 272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
